

Electric control circuit for motor vehicle heating or air conditioning system

Patent number: DE19828259
Publication date: 1999-12-30
Inventor: BIERMANN GERD (DE); LOCHMAHR KARL (DE);
MARTIN RALF (DE); WAIBEL KLAUS (DE)
Applicant: BEHR GMBH & CO (DE)
Classification:
- **international:** G05B15/02; H01R29/00; H03M11/22; G05D23/00;
B60H1/00; B60R16/02
- **european:** H01R29/00, G05B19/10S
Application number: DE19981028259 19980625
Priority number(s): DE19981028259 19980625

Abstract of DE19828259

The circuit has a data bus (3) connection and a device allocates device numbers to each circuit. The circuit includes a memory (4) coupled to the data bus for storing device numbers, and a set of switches or connectors (5) for setting the device numbers. The memory may be an EEPROM
